3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a probability generating apparatus having a combination of elements as recited in claims 76, including a control circuit utilizing predetermined bits of set data (k) in a register to determine direction and speed of rotation of data and for utilizing timing t(n) to control shift direction and number of random number data set in a shift register; and a comparator having a first comparator portion for comparing a set data

value (n) in the register with a count in a counter, and a second comparator portion for comparing the data for generation of probability with probability lower limit data and probability upper limit data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
